

# Tear Function Survey

Dry, scratchy, irritated eyes? Eye irritation can be subtle or extreme ranging from the occasional dry or gritty sensation to ongoing tearing and discharge. Depending on the severity of your symptoms, you may be suffering from more serious conditions such as Dry Eye Disease and Meibomian Gland Dysfunction, both of which will compromise tear production and functionality.

The only person that can make a Dry Eye Disease diagnosis and provide treatment options is your doctor. To assist your doctor in determining what's right for you, answer the following questions and give the completed survey to your doctor prior to your eye exam.
